DIRECTORY  
ILLINOIS SAND AND GRAVEL PRODUCERS

W. L. Busch

This directory has been assembled to serve as a guide to the many individuals and companies producing common sand and gravel in Illinois.

Based on the most complete information available at the time the directory was compiled, the following list shows that 74 counties throughout Illinois have supplied common sand and gravel for various industrial activities. Within these counties, some 235 individuals and companies produced sand and gravel from about 355 operations. The reported production of common sand and gravel in Illinois for the year 1965 amounted to a total of about 31.6 million tons and was valued at 27.8 million dollars.

Counties in the northeastern part of the state produced the largest amounts of sand and gravel. As a group, 11 counties in this region produced 17.9 million tons of this material which was valued at 14.7 million dollars in 1965. The northwestern and central regions of Illinois also are important in the production of sand and gravel. With the exception of some counties which border on the Mississippi, Ohio, and Wabash Rivers, the southern third of Illinois has few sand and gravel producing areas.

In 1965, McHenry County was first among all Illinois counties in the production of both sand and gravel. Second in sand production was Will County with Winnebago County third and Kane County fourth. Following McHenry County in gravel production, were Kane, Will, and Peoria Counties in that order.

Although there are no doubt more sand and gravel operations than the directory indicates, complete and current information regarding every possible producer at any given time and place is not available. Operators who produce only silica sand or natural bonded molding sand are not included in this directory.

This publication replaces the Directory published in April 1963 as Mineral Economics Brief 6, which is now out of print.

A very faint, light gray watermark-like image of a classical building with four prominent columns and a triangular pediment occupies the background of the entire page.

Category	Definition	Example	Notes
1. General Information	Information about the organization, its mission, and its history.	The company's website, annual reports, and press releases.	This category includes information that is not specific to a particular product or service.
2. Product/Service Information	Information about the products or services offered by the organization.	The company's product catalog, service offerings, and pricing information.	This category includes detailed information about the features and benefits of the organization's products or services.
3. Financial Information	Information about the organization's financial performance, including revenue, profit, and cash flow.	The company's financial statements, earnings reports, and press releases.	This category includes information about the organization's financial health and stability.
4. Legal and Regulatory Information	Information about the organization's legal status, regulatory compliance, and risk management.	The company's legal documents, regulatory filings, and risk assessments.	This category includes information about the organization's legal obligations and potential risks.
5. Human Resources Information	Information about the organization's employees, including hiring, training, and compensation.	The company's employee handbook, training programs, and compensation packages.	This category includes information about the organization's workforce and employee benefits.
6. Marketing and Sales Information	Information about the organization's marketing strategies, sales performance, and customer acquisition.	The company's marketing materials, sales reports, and customer acquisition data.	This category includes information about the organization's marketing efforts and sales results.
7. Technology and Innovation Information	Information about the organization's technology infrastructure, research and development, and innovation.	The company's technology roadmap, patent filings, and innovation awards.	This category includes information about the organization's technological capabilities and innovation.
8. Environmental and Social Information	Information about the organization's environmental impact, social responsibility, and corporate citizenship.	The company's sustainability report, social audit, and corporate citizenship awards.	This category includes information about the organization's environmental and social impact.
9. Strategic Planning and Analysis	Information about the organization's strategic planning, analysis, and decision-making processes.	The company's strategic plan, analysis reports, and decision-making documents.	This category includes information about the organization's long-term goals and strategic direction.
10. External Factors and Influences	Information about external factors and influences that affect the organization, such as market trends, industry regulations, and political changes.	The company's market analysis, industry reports, and political influence documents.	This category includes information about the organization's external environment and how it affects its operations.
